

With the years of experience in the cooperative sector and in the ICA 2018 up to this very moment, I intend to apply for a position in the Executive committee not for my personal interest but to share my knowledge, experiences, and dedication to the committee and the members of ICA in the Global Level in involving youth in the cooperative sector while they are still young. I am exposed to the ground level (community level) in our country in promoting partnership among organizations and different government agencies to motivate the youth to join cooperatives. I have also served the ICYC Asia and Pacific for a quite some time and I believe I have the qualities of being elected and nominated and be part of the Executive Committee.
